

INDUSTRIAL SURFACES CLEANING

BUILT FOR TOUGH JOBS

INDUSTRIAL SURFACES GROUP B.V.

Industrial Services for Demanding Environments

ISC supports onshore and offshore operations with specialist industrial cleaning, hydrodemolition, decommissioning and shutdown services, backed by engineering expertise and certified personnel.

WHERE WE EXCEL

- **Industrial Cleaning**
- **Hydrodemolition**
- **Decommissioning Support**
- **Shutdown & Turnaround Services**

OUR APPROACH

Precise planning, strict safety standards and operational efficiency are built into every project, helping clients reduce downtime and achieve reliable, high-quality results.

WHY CHOOSE ISC

- **Hydroblasting up to 44,000 PSI / 3,000 bar**
- **SIR-, VCA- and OPITO-certified personnel**
- **Engineering support and job-specific solutions**
- **Onshore and offshore capability**
- **Caribbean-based with rapid regional mobilization**

CAPABILITY. SAFETY. EXECUTION.

Integrated support for demanding industrial projects.

01 INDUSTRIAL CLEANING

High- and ultra-high-pressure water jetting for tanks, heat exchangers, tube bundles, process pipelines, vessels, structural steel and surface preparation. Manual, mechanized and robotic methods are selected to suit the worksite and objective.

02 HYDRODEMOLITION

Controlled concrete removal, surface roughening and exposure of reinforcement using high-pressure water. The method supports accurate removal with reduced vibration and minimal impact on the remaining structure.

03 DECOMMISSIONING SUPPORT

Specialist cleaning, abrasive water jet cutting, cold cutting and surface preparation to support safe dismantling, asset retirement and preparation for inspection or removal.

04 SHUTDOWN & TURNAROUND SERVICES

Project preparation, specialist personnel, equipment deployment and on-site execution for time-critical maintenance windows. Our engineering support helps align methods, resources and safety requirements before mobilization.

INDUSTRIES WE SERVE

OIL & GAS

PETROCHEMICAL

POWER GENERATION

MARINE & OFFSHORE

MINING

MANUFACTURING

INFRASTRUCTURE
